Subject: SSVEC 69KV Line in Sonoita & Elgin Feasibility Study

RECEIVED
2009 OCT -2 P 3:53
ARIZONA CORPORATION COMMISSION
DOCKET CONTROL

Hello,

We are property owners in Sonoits Hills and will be directly effected by one of the proposed routes for the 69KV line that is being considering for the Sonoita and Elgin areas. I understand that there is a request to not have an independent study for this project. We feel that any project of this size and impact on the area should not go unchecked. We would like for an independant feasibility study to be run on this project. We understand that the SSVEC employees have been filling up mailboxes with votes for NOT running a independent feasibility study. We don't think this is right. We understand the need for upgrading the power to the area but if not done correctly once installed will not be able to be undone. Keep in mind the carpenters addage for measuring twice before cutting once. We would like to see that all possibilities and impacts are looked at before proceding. We feel a feasability study that is independent of all parties involved will provide better information to you before approving SSVEC's new 69kv line along its current proposed route.

Utilities' Response:

Investigator's Comments and Disposition:

10/1/09 I contacted property owner and informed him that his opinion for a feasibility study has been received. I informed him that it will be filed in the SSVEC rate case and that all Commissioners and Staff involved will be getting a copy of his opinion. He appreciated the information. Closed
